

Software Integration Solution

- Integration**
 Integrating weighbridge with ERP system facilitates the weigh data to be available for stores, purchase, sales and management for data driven decision.
- Security**
 Integration of surveillance, access control, positioning solutions ensures security of weighment and online data.
- Surveillance**
 Inspects vehicle before entering and after leaving weighbridge and ensure correct weighment of material.
- Access Control**
 Restrict the entry of unauthorized vehicles as boom barrier and traffic lights allows entry to authorized vehicles only
- Safety & Guidance**
 Guides driver regarding correct positioning of vehicle and doesn't allow another vehicle until positioned vehicle moves out of weighbridge after weighment.
- Correct Positioning**
 It is used for vehicle detection and correct positioning of vehicle hence ensures correct weighment

Advantages

of

Software Integration Solution

- Facilitates to have all the weighing data of all weighing systems at various location at your desktop.
- Contributes in improving the efficiency and profitability by better control and data driven decision.
- Eliminates the need of operator for weighment.
- Restricts the entry of un-authorized vehicle.
- Ensures correct weighment by right position and inspecting the vehicle before entering and leaving the weighbridge.
- Improves safety by restricting entry of another vehicle till the vehicle at weighbridge moves after weighment
