

Unmanned Weighing System

Advantages

of

Unmanned Weighing Solution

- Eliminates the need of operator for weighing.
- Restricts the entry of un-authorized vehicle.
- Ensures correct weighing by right position and inspecting the vehicle before entering and leaving the weighbridge.
- Improves safety by restricting entry of another vehicle till the vehicle at weighbridge moves after weighing

Unmanned Weighing System

● Surveillance

Inspects vehicle before entering and after leaving weighbridge and ensure correct weightment of material.

● Access Control

Restrict the entry of unauthorized vehicles.as boom barrier and traffic lights allows entry to authorized vehicles only.

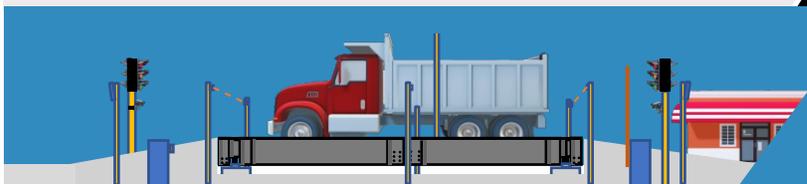

● Safety & Guidance

Guides driver regarding correct positioning of vehicle and doesn't allow another vehicle until positioned vehicle moves out of weighbridge after weighing.

● Correct Positioning

It is used for vehicle detection and correct positioning of vehicle hence ensures correct weighing.

Unmanned weighing system is a fully automated weighing process for error free operation of accurate weighing. It saves man power and minimizes human interference,thus results in accurate weighing.
